Education

PoliMi (Politecnico di Milano)

BACHELOR IN COMPUTER ENGINEERING

Milan, Italy

Sep. 2020 - June. 2023

- I'm a freshman at Politecnico di Milano studying Computer Engineering.

Itt Buonarroti (Technical Institute)

HIGH SCHOOL DIPLOMA IN CS

Trento, Italy

Sep. 2015 - June. 2020

- I've graduated with full marks (100/100) in Computer Science at Trento's Technical Institute.

Experience

YoungJobber

CO-FOUNDER & LEAD DEVELOPER

Trento, Italy

Nov. 2020 - Present

- YoungJobber is newly found startup that is hoping to connect teenagers and people that are seeking help for quick jobs.
- Designed the overall project architecture. Built the back-end system and REST APIs with ExpressJs and MySQL.
- Design and development of the front-end and the mobile app using EJS, Bootstrap, JQuery and Flutter.

Freelancing

SOFTWARE ENGINEER

Trento, Italy

Jun. 2018 - Present

- Build a management system to track the inventory for Logica 2.0 a packaging & logistic company
- Developed a website to showcase properties for Studio Immobiliare Europa, a real estate agency

FBK WebValley

RESEARCH FELLOW

Val di Non, Italy

Jun. 2019 - Jul. 2019

- I've been selected from a pool of international candidates to take part in the 2019 WebValley summer school.
- Analyzed ultrasound images, genetic data and clinical information of thousands of patients to find patterns of cardiovascular diseases.
- Presented the Deep Learning frameworks to many important figures, including the heads of the Italian Space Agency and FBK.

AI Open Innovation Lab

SOFTWARE ENGINEER & DATA SCIENTIST

Trento, Italy

Mar. 2019 - May. 2019

- Worked on AI models to make queues at the pharmacy more appealing for the customers and profitable for the pharmacist.

Projects

Covid19 Stats

MOBILE DEVELOPMENT

Trento, Italy

Mar. 2020

- An cross-platform open source mobile app to visualize charts and insights on the current Covid-19 pandemic.
- Developed using Flutter and FCharts. The GitHub repo has now more than 125 stars and many contributions from the community.

NeatJS

DEEP LEARNING & GENETIC ALGORITHMS

Trento, Italy

Oct. 2018

- A JavaScript implementation of the "NeuroEvolution of Augmenting Topologies" algorithm, demos made with p5.js and three.js.
- The examples apply the algorithm to target seeking, classification, self-driving in a 3d space and even Asteroids (the arcade game).

Registro LampSchool

MOBILE DEVELOPMENT

Trento, Italy

Feb. 2018

- A Xamarin (C#) mobile app for LampSchool, an open source school register widely used by schools throughout northern Italy
- I gained experience with app deployment (on both iOS and Android), maintenance and user support.
- The app now has almost 10k downloads and more than 2k monthly active users.
